Dear Customers!

We would like to present you our offer for logistics and warehouse services in the Gdansk port.

We have been working in the export and import of steel products for almost twenty years. This work has allowed us to gain a lot of experience in handling contracts.

Based on the experience gained, we have started our own logistics operations and offer comprehensive, tailor-made services in the field of warehouse management, customs clearance and logistics, including:

- taking a container with material in the port;
- customs clearance of the material;
- unloading and storage in our warehouse;
- delivery to the indicated place;
- receiving material from you;
- transport to / from the port;
- loading material into containers, fixing;
- sea shipment to your customer.

We are able to handle heavy containers (20' - 28t gross of the loading itself). We have equipment that allows weighing each coil / pallet and we keep customs warehouse and temporary storage warehouse.

Location of warehouses

Our warehouses are located in the vicinity of the DCT Port and GTK and are about 5 km away from it. The picture below shows their location.

Legend:

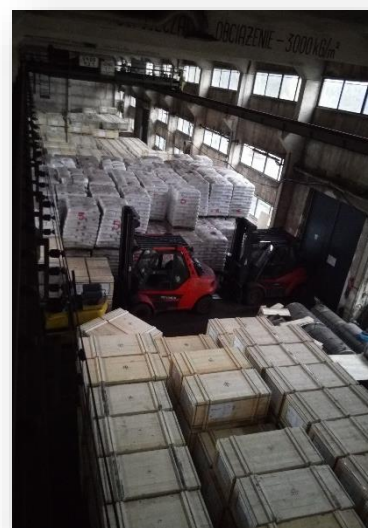

1. Unit 1 – Budowniczych portu polnocnego 17 Street
2. Unit 2 – Majora Henryka Sucharskiego 69 Street
3. Unit 3 – Ku Ujściu 4 Street

The Port Service

We offer full service of the broadly understood collection of material in the port, as well as transport of material by land or sea. Depending on the client's needs, we can deal with the unloading or loading of containers, any port operations, customs clearance, material inspection, transport to the warehouse. [At the Customer's request, we also assist in implementing a simplified procedure enabling deferment of VAT.](#)

Warehouse services

In a warehouse located at the Budowniczych Portu Północnego 17 street we have a hall with an area of 1440m² with two aisles equipped with a bridge crane with a capacity of 8 tons. In addition, the hall has an additional 1440m² light storage space on which we can store, sort and package the products. The warehouse also has 3438 m² of open square.

On the second unit on Majora Henryka Sucharskiego 69 street we have 950m² covered area with 16 gates, 130m² covered area without gates and 2300m² open square. The pictures shown below present unit 2.

Unit number 3 have 18800m² open paved square.

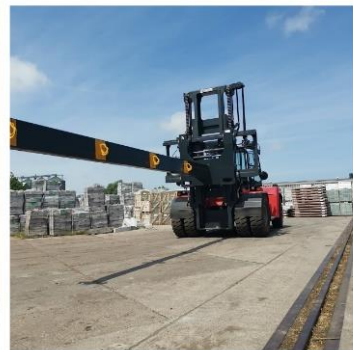

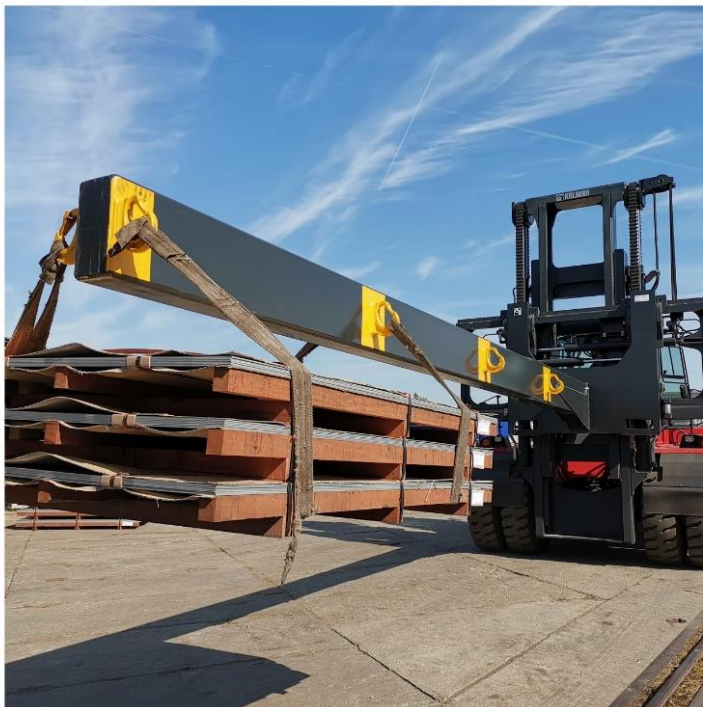

All warehouses are fenced and connected to port security monitoring.

Forklifts and ramps

We own:

- 2 forklifts with a lifting capacity of 8 tons,
- 2 forklifts 6 tons with the possibility of working in a container,
- 5.5 ton forklift with the possibility of working in a container,
- 3.5 ton forklift with the possibility of working in a container,
- 2.5 ton forklift with the possibility of working in a container,
- 32 ton forklift with specialist accessories enabling to put down container to the ground. With option to handle long and oversized goods.
- Two safety bolts for transporting metal in coils,
- Scale on the forks with a printer - enabling verification of the actual weight with documentation,
- Crane extension for transporting long products (up to 2 tons),
- Three 15-ton and one 20-ton ramp enabling entry into the container.

Our new forklift is the **KALAMR with capacity of 32 tons**. It has the ability to put down full container to level 0 and service long and heavy products. We also have special equipment for heavy steel coils.

Transportation Services

At the client's request, we are able to organize transport from the warehouse to the indicated location.

We have a wide range of cooperating transport companies with semi-trailers, curtains.

The warehouses are connected to the port alarm system and to the monitoring system.

Warehouses are insured against damage to property on the material in our warehouse and in the event of damage during logistic work.

✓ **PROFESSIONALISM**

Efficiency of work in the warehouse is supervised by the warehouse manager and warehousemen. All gentlemen have the necessary permits to operate the forklifts and overhead crane and they have many years of professional experience in handling various goods like steel, pallets, stones, slabs, big bags, boxes, etc.

Warehouse working hours are from 8-16, but in periods of high job intensity, working hours are adjusted to customer needs.

✓ **QUALITY CONTROL & INFORMATION**

After each loading or unloading - customer is informed by e-mail. Each loading/unloading is only possible after previous advising mail.

The release of goods is provided together with loading documents on Premco's or clients letterheads, on customer request and choice.

Every day in the morning we are sending current inventory to persons authorized by our customers.

During unloading / loading we take pictures and send to the client (available on request).

If there was a technical problem with the material we immediately inform customer and if necessary call on the relevant independent service for issuing an external report (eg. for visible damage material / truck / container).

*** On request, we provide supervision of independent inspectors over work on unloading or forming containers.**

✓ **FLEXIBILITY**

At the warehouse we are able to palletize material - standard dimensions or custom pallets (on request).

We use fumigated wood (necessary for forming containers in the export).

Upon request, we do marking / neutralization of tags or labels or we can do steel sampling.

Possibilities of the port of Gdansk

The Port of Gdansk becomes the world leader in terms of growth rate and the number of container transshipments. Our company and our capabilities are developing with the port. The Port of Gdansk has been in the top 100 ports in the world in the last 5 years and is already in 15th place in Europe in 2018. DCT Gdański is in the process of expanding and increasing the space for storing containers from import and export. The pictures below show a place for the expansion of DCT Gdansk and how the port of Gdansk falls on other terminals.

We sincerely invite You to cooperation.

Best Regards
